*We're supporting multiple cloud Projects*

## **Table of Contents**

We've been supporting Cloud Based Projects

-  Azure cloud
-  AWS Cloud
-  Artificial Intelligence

## **SECTION A: EXECUTIVE SUMMARY**

- ❖ **Azure Cloud purchasing** based on projects billing (50L,1Cr,2Cr for 5Cr/10Cr/15Cr/20Cr)
- ❖ **Azure Cloud Infrastructure** Provisioning as per budget (Monthly billing/ Yearly billing) based on list of projects
- ❖ **Azure Cloud Business Applications Development**, Implementation & Deployment as per client's requirements
- ❖ **Infrastructure Automation** & Application development Automation, Implementation Automation, Deployment Automation.
- ❖ **Artificial Intelligence Design**, Implementation, Automation and Integration for client projects
- ❖ **Artificial Intelligence** – Design, Implementation, Automation of GenAI, Client chatbot, Agentic AI, Multi Agents, Voice Bots for Business Applications, Enterprise Business Applications.
- ❖ **Artificial Intelligence** – Automate client Infrastructure for all Environments, Dev, QA, Preprod, Prod, DR

## **SECTION B: PROJECT DESCRIPTION, CONTENTS AND VISION**

**Artificial Intelligence area – we're developing, implementing AI Products for Multiple Vendors, Clients – Pan-India, US, UK**

- 2.1. Overall and specific objectives for **Azure cloud, Artificial Intelligence**
- 2.2. Targeted & Deadlines AI Implementations, product releases as expected timelines, outputs, activities and related methodology of implementation of Azure cloud and Artificial Intelligence.
- 2.3. Targeted AI Infrastructure and Products for multiple clients – PAN-India, US, UK.
- 2.4. Direct and indirect AI Products for multiple clients Business Applications.
- 2.5. Impact and impact pathways
  - 2.6 1. Artificial intelligence – Agents, multi-Agents Implements for Business applications for ServiceNow, Salesforce, Interface Payment Gateway Application.
  - 2.6.2. Adaptation to climate change and environmental sustainability on Azure cloud with AI Studio / AI Factory
  - 2.6.3. Scientific impact for AI Enterprise Copilot Integration for Business Applications.
  - 2.6.4. Capacity development and empowerment using AI for Enterprise Applications & cloud-based applications.
- 2.6. Relevance to national/regional priorities in its plans for Azure cloud & AI

## **SECTION C: OPERATIONS**

- 3.1. Automation Methodology of project implementation using Artificial Intelligence and cloud
- 3.2. Partnerships and collaboration arrangements with clients
- 3.3. Project management team – We're projects exports and has been working as CTO's, CIO, Multi-project Leads for different Banking & Non-Banking Clients (Indian Banking Clients and US, UK Banking Clients.)
- 3.4. Sustainability – We're supporting multiple clients more than 10+ years for multiple domains – Banking, Non-banking, Insurance, retails, Finance etc.

### ***PROJECT PROPOSAL COVER SHEET***

---

Project Name: **HR-AISOLUTIONS – Azure cloud and artificial intelligence**

Project Title: An Integrated Approach to Implement Artificial Intelligence for our Azure Cloud Based Business applications on PAN-Indian Region

Project Duration: **36 Months**

Target crops: **Artificial Intelligence** (hr-aisolutions pvt ltd.)

Targeted developing country/ies: **Pan-India**, - US, UK (In Future).

Project geographic extension (km<sup>2</sup>): 296,540

Total requested funding: **5CR, 10CR, 20CR** (For 3-Projects - We're expecting 3-projects on Azure cloud Project, AI Project, Business Application development Project)

Total co-funding: 50L

**Please select the type of project you are applying for:**

- ✓ **Single-country Immediate Action Project**
- ✓ **Multi-country Immediate Action Programmed (Based on Billing window)**
- ✓ **Single-country Co-development and Transfer of Technology project**
- ✓ **Multi-country Co-development and Transfer of Technology project (Based on Billing window).**

### ***GENERAL REQUIREMENTS:***

---

These guidelines have been prepared to support applicants in the development of full project proposals. They describe the requirements that all applicants should adhere to when developing their full project proposal.

Please make sure you read these guidelines carefully before proceeding to fill in the Project Proposal Form. The full proposal should be prepared taking into account the thematic focus of the Third Call for Proposals, including in particular, the rationale, scope and expected outputs for each Window and sub-Window.

Project proposals must be clear and realistic on the problem to be addressed and objectives it tries to achieve. Project objectives have to fit in the thematic focus of the call and ultimately contribute to food security and poverty alleviation. Project objectives have to be logically interlinked with the planned activities, outputs and expected outcomes. The objectives and outputs have to be feasible in terms of duration and resources requested. The information to be provided in each section has to be focused and straightforward, qualitatively and quantitatively measurable in terms of what will be done, with what purpose, who, why and how will be involved in the activities to be implemented, who and how many will directly and indirectly benefit from the implementation of the project. A good full proposal will have a sound, clear and logically linked methodology of implementation and management.

If required, we'll submit the full project proposal, additional attachments (endorsement

letters, funding commitments, certification of the status of the organization) can be provided.
